

Join Us — Aortic Dissection and Aneurysm Awareness Day

Wednesday, Oct. 8

9 am to 3 pm

Wang Center, Stony Brook University

Free

Aortic dissections and aneurysms often go unnoticed — until it's too late.

Join us for a **FREE** community event and hear powerful patient stories of survival, get informed by our expert physicians and **receive a free screening**. The screening will be most beneficial for patients with the following risk factors:

- Current or past tobacco use
- High blood pressure
- High cholesterol
- Personal or family history of vascular disease, aortic aneurysm (a weak spot in the wall of the aorta that begins to bulge), or aortic dissection.

Whether you're a survivor, currently diagnosed or have a family history — this is for **YOU**.

Registration is required. Visit stonybrook.info/aortic-awareness-day. Questions? Call (631) 216-9036.
